WORK EXPERIENCE

Arctic Wolf Networks *Waterloo, ON*
Senior Developer January 2023 - Present
Member of technical staff May 2018 - August 2018, January 2019 - August 2019, July 2020 - December 2023

- Used Esper, Apache Flink and Hadoop as part of a complex event processing pipeline to find patterns in unbounded series of real-time events
- Lead design and implementation of auto-scaling microservices supporting over 350000 messages per second
- Integrated new functionality without downtime into a data analysis pipeline processing 50 billion messages per day
- Used Agile development techniques to design, implement, and support software systems at all stages of the software life-cycle

Carnegie Technologies *Waterloo, ON*
Native back-end developer May 2017 - December 2017

- Developed native C++ GPS and ephemeris libraries for use in embedded devices
- Implemented REST style microservices using Node.js and RabbitMQ
- Designed and implemented C++ and Node.js RabbitMQ messaging library with support for a variety of usage patterns (Consumer, Requester)
- Designed and implemented C++ JSON manipulation and validation library with support for proprietary extensions to JSON schema specification

EDUCATION

University of Guelph *Guelph, ON*
B.Comp. Software Engineering (Co-op), Honours. Marketing minor September 2015 - April 2020

- Dr. Mary McLeish Scholarship recipient (Highest GPA in Software engineering major)
- 2018 Braithwaite Business Scholarship
- Dean's Honours list

PERSONAL PROJECTS

HugoKlepsch/Go-Snake
June 2021

- Created "Snake" AI to battle other snakes in battle-royale snake competition
- Won 1st in Platinum league out of hundreds of other competitors
- Used Dijkstra path-finding algorithm to optimize food intake
- Used Minimax algorithm to find game moves with highest chance of success

VOLUNTEER HISTORY

Alumni and programming mentor, former student member *Burlington, ON*
M. M. Robinson high school's FRC team, "MMRambotics", team 2200 September 2013 – Present

- Created various sub-systems for functional mechanisms
- Used PIDF closed-loop control, computer vision, motion profiling, path following for autonomous control of robot
- Used encoders, potentiometers, limit switches, line followers, ultrasonic rangefinders & cameras as input data for control loops
- Taught high-school students about control flow, program structure, git & the above

TECHNICAL STRENGTHS

Computer Languages

Python, Go, Java, Bash, C/C++, Node.js

Tools & Tech

Linux, Git, Docker, K8s, Prometheus metrics, Command-line tools, Kafka, Avro, Hazelcast, Flink, Esper, Hadoop, ElasticSearch, AWS-{S3, SQS, Lambda, ElastiCache, CloudFormation, CloudWatch, EC2}, UML, RabbitMQ, Vim, LaTeX

Development Practices

Agile: {Scrum, Spiral}, Waterfall, DevOps, CI/CD, Test Driven Development, Risk management, Technical reviews, Quality assurance
